

# PORTFOLIO

**motion**

**designer** Mary Pavin  
**manufacturer** Fabbian Italy  
**features** The symmetrical styling of the sharp and sleek Motion makes it a key chic piece for any modern or retro inspired space with the additional benefit of energy saving or halogen lamps and the flexibility of multiple glass diffuser options. Supported by a polished chromium-plated structure, the collection features coloured silk-screen printed, tempered glass diffusers in an assortment of different patterns such as straight strips, waves and diagonal stripes and available as a pendant, ceiling or wall lighting fixture **available from** Fabbian Lighting  
**dimensions** Varied sizes and styles **materials/finishes** Available in white stripes, black stripes, black and white stripes, blue wave and red diagonal stripes **for more information** Fabbian Lighting **phone** 03 9696 5155 **fax** 03 9696 5045 **email** info@fabbian.com.au **web** www.fabbian.com.au

**3form material solutions**

**manufacturer** Hunter Douglas **features** 3form Material Solutions from Hunter Douglas Commercial are innovative and eco-friendly translucent panels that can transform into wall dividers, ceilings, sliding doors, table tops and more. A number of material platforms are available, including 3form Varia, Chroma and Glass. Boasting an impact strength 40 times that of glass, Varia is a dynamic panel system that combines contemporary design with eco-resin to encapsulate colour, organic material, textures and custom graphic images. Chroma, available in a palette of expertly designed colours that, when illuminated, emit radiant jewel-like colour, is made from 100 percent cast acrylic that is non-toxic, highly durable, reusable and recyclable. A dramatic centrepiece, Glass is a premium product with unbelievable depth and materials that are delicately and dimensionally preserved **for more information** Hunter Douglas **phone** 13000 3form (1300 033 676) **web** www.3-form.com and www.hunterdouglascommercial.com.au

**manufacturer** BubbleDeck Australia New Zealand **features** BubbleDeck, the Danish building system based on hollow core technology, is now in Australia. BubbleDeck is a simple system that solves a vexing problem for architects – how to eliminate most beams and columns to allow for more space. BubbleDeck is a biaxial hollow deck in which plastic spheres eliminate non-structural concrete, making building time quicker and more cost-effective. A far less complicated method of creating buildings, BubbleDeck allows architects complete design flexibility **available from** BubbleDeck Australia New Zealand **for more information** Gavin Cooke at BubbleDeck **phone** 1300 BUBLDK **email** info@bubbledeck.com.au **web** www.bubbledeck.com.au

**daniel robertson brick facings – a stylish option**

**manufacturer** Daniel Robertson **features** The dramatic entry wall to Melbourne's Crown Casino's newest restaurant, Bistro Guillaume, features Daniel Robertson's brick facing tiles. Measuring 230 by 76 millimetres and only 16 millimetres thick, they are laid with an adhesive mix. Often a brick appearance is required, but engineering constraints make this difficult. Daniel Robertson offers a range of brick facing solutions for fixing to structures. They can solve the problem of replicating external brickwork whilst still adhering to the constraints. Brick facings are sometimes known as thin brick or brick slips. Daniel Robertson brick facing tiles are available in our brick texture, a wire-cut texture and a smooth texture, each in a broad range of colour blends. Often this allows matching bricks and brick facings to be used together. Corner pieces are also available to ensure an authentic appearance to your project. **for more information** Daniel Robertson **phone** 03 9875 3000 **web** www.danielrobertson.com.au

## izona cooldrawer

**designer** Mark Elmore **manufacturer** Fisher & Paykel **features** CoolDrawer is the world's first multi-temperature fridge drawer enabling you to cool, store, freeze, preserve and freshen foods at the choice of five specifically designed temperature controls. The 900-millimetre-wide easy pull-out drawer system with premium quality runners provides smooth and easy entry to food. Ergonomically, CoolDrawer exceeds expectations as there is no need to bend to access the freezer or reach the top shelf of a fridge **available from** leading kitchen appliance specialists **dimensions** (all millimetres) height: 640, width: 855, depth: 557, depth of drawer: 520 **materials/finishes** stainless steel or can be integrated into your kitchen cabinetry **for more information** Izona **phone** 1300 650 590 **web** www.izona.com.au

## somfy façade management systems

**features** Somfy's Animeo Façade Management System maximises building efficiency and occupant comfort. Animeo offers one solution to give control for glare, thermal efficiency and ventilation through control of internal and external blinds, awnings and windows. The latest thinking from European green building design has seen a preference for independent control systems working in harmony through a combination of timers, sun tracking software and weather sensors. Unlike an integrated Building Management System, Animeo, as a stand-alone system can be quickly and easily configured with a minimum of fuss. In addition the use of an Animeo system can assist with meeting Green Star compliance points **for more information** Somfy **phone** 1800 0 SOMFY **fax** 02 9638 0075 **email** somfy.au@somfy.com **web** www.somfy.com.au

## polysafe slip resistant flooring

**manufacturer** Polyflor Australia **features** This unique pattern was created by utilising water jet technology to empower a design that incorporates the dynamic colours of the Polysafe range to create a slip resistant floor that adds to the aesthetic appeal of a commercial change room whilst enhancing the end users' experience. Polyflor warrants that the slip classification of the complete Polysafe range shall be sustained for the guaranteed life of the product. Since 2000, the Polyflor production facility has been operating under ISO 14001 Environmental Management System accreditation and has received the Queen's Award for 'Enterprise for continuous product innovation and development' with the cornerstone of the safety flooring product being the exclusive Supratec+, a soil releasing polymer system enhanced with polyurethane, which saves up to 60 percent life cycle costs when compared to traditional safety flooring. There are six ranges and in excess of 70 colour patterns to choose from **phone** 1800 777 425 **fax** 03 9215 4444 **email** sales@polyflor.com.au **web** www.polyflor.com

## tension fixing systems

**manufacturer** Locker Group **features** The L5 Tension system allows continuous drops of wire mesh, perforated or expanded metal to be installed quickly and easily as an internal balustrade, or externally as a sun shading façade. The system provides enormous material possibilities in terms of panel size and material choice and, when combined with Transit or Mesh Art ranges, can provide continuous panels up to five metres wide in 15-metre drops. **available from** Locker Group **dimensions** dependant on material choice **for more information** Locker Group **phone** 1800 635 947 **email** info@locker.com.au **web** www.locker.com.au
